

Electronics/ Electrical Repair - Ottawa

Pylon Electronics Inc

-

Ottawa, ON

Pylon Electronics Inc. is an ISO 17025-certified calibration facility supporting electronic and physical test equipment and is one of the largest Canadian Owned Calibration Laboratories. Pylon Electronics has a solid reputation in the repair and calibration of measuring instruments. We have six laboratories in Ottawa, Toronto, Dartmouth, Calgary, Edmonton, Richmond, and a Technical Sales office in Montreal, QC.

Job Description:

Pylon Electronics Inc. seeks an ambitious individual with skills and qualifications for a full-time position as a Senior Electronics Repair person in support of the Ottawa Electrical Lab.

Your responsibilities will include reviewing and improving Repair and/or calibration processes and procedures, testing equipment and data reporting. Effective communication skills and competent technical knowledge will allow you to interface with customers and co-workers to provide effective calibration solutions. Must be willing to travel.

Minimum skills / Requirements:

- Graduate of an Electrical or Electronics Technical Program
- Minimum of 3 years of electronics repair with advanced electronics knowledge
- Well-organized and attentive to details
- Demonstrated communication skills
- Meticulous work habits
- Knowledge of one of the following programming: VBA, MatCal, LabView

Additional qualifications:

- Above-average skills with MS Excel, and VBA.
- Other programming experience will be considered an asset, in particular, MetCal and LabView
- Working knowledge of ISO/IEC 17025
- Specific experience or training with Electronics measuring/sourcing equipment
- RF & Microwave experience

Pylon Electronics Inc. is an ISO/IE17025-accredited calibration facility supporting electronic and physical test equipment. The Electronics Laboratory services various equipment ranging from basic analog DC measurement/sourcing gear to sophisticated high-frequency equipment.
